UFP FACTORY BUILT
A UFP INDUSTRIES COMPANY

SPARTAN CARGO TRAILERS

A CONTRACTOR'S TRAILER **BUILT TO LAST**

The UFP Factory Built Engineered Structural Panel (ESP) for the walls, floors, and deck will further enhance your Spartan trailer's structural integrity and stability.

- No knotholes or core voids
- Free of patches, putty & other Imperfections
- Excellent anti-swell properties
- Resists rot, mildew, cupping, cracking, warping or delamination
- Flame resistant meaning burn rate is less than 4" per minute

UFP Factory Built Engineered Structural Panels (ESP) are manufactured with additional resins and wood to deliver extra strength and rigidity necessary to withstand the day-to-day rigors of cargo trailer applications.

FAR SUPERIOR RESISTANCE TO HEAVY LOADS AND RUGGED USE

DATA SPEAKS!	Parallel Bending Stiffness ($lbf\text{-}in^2/ft$)	Perpendicular Bending Stiffness ($lbf\text{-}in^2/ft$)
3/4" ESP floor in Spartan Trailer	374978 (↑ 13.63%)	195819 (↑ 243.54%)
3/4" Plywood	330000	57000

Parallel Bending Stiffness – Measure of resistance to deflection caused by the distributed weight along the trailer's length.

Perpendicular Bending Stiffness – Measure of resistance to deflection or failure of the floor under concentrated loads, such as heavy equipment.
